

# Coronavirus disease (COVID-19)

## Situation Report – 173

Data as received by WHO from national authorities by 10:00 CEST, 11 July 2020

### Highlights

Yesterday, WHO launched the [Access Initiative for Quitting Tobacco](#), which aims to help the world's 1.3 billion tobacco users quit during the pandemic. Smoking kills eight million people a year and smokers are more vulnerable to developing a severe case of COVID-19. WHO received its first-ever donation of nicotine replacement therapies for the project from Johnson & Johnson Consumer Health. The Initiative also enlists the help of WHO's - and the world's - first ever virtual health worker, Florence. You can [speak with Florence](#), to dispel myths around COVID-19 and smoking, and to help develop a personalized plan to quit tobacco. WHO is in the final stages of adding more partners and encourages pharmaceutical and technology companies to join this initiative.

WHO has published [guidance on maintaining a safe and adequate blood supply during the coronavirus disease pandemic](#).

Last Thursday WHO Director-General Dr Tedros announced the establishment of the Independent panel for Pandemic Preparedness and Response (IPPR) to evaluate the world's response to the COVID-19 pandemic. [“This is a time for self-reflection, to look at the world we live in and to find ways to strengthen our collaboration as we work together to save lives and bring this pandemic under control”](#) said Dr Tedros.

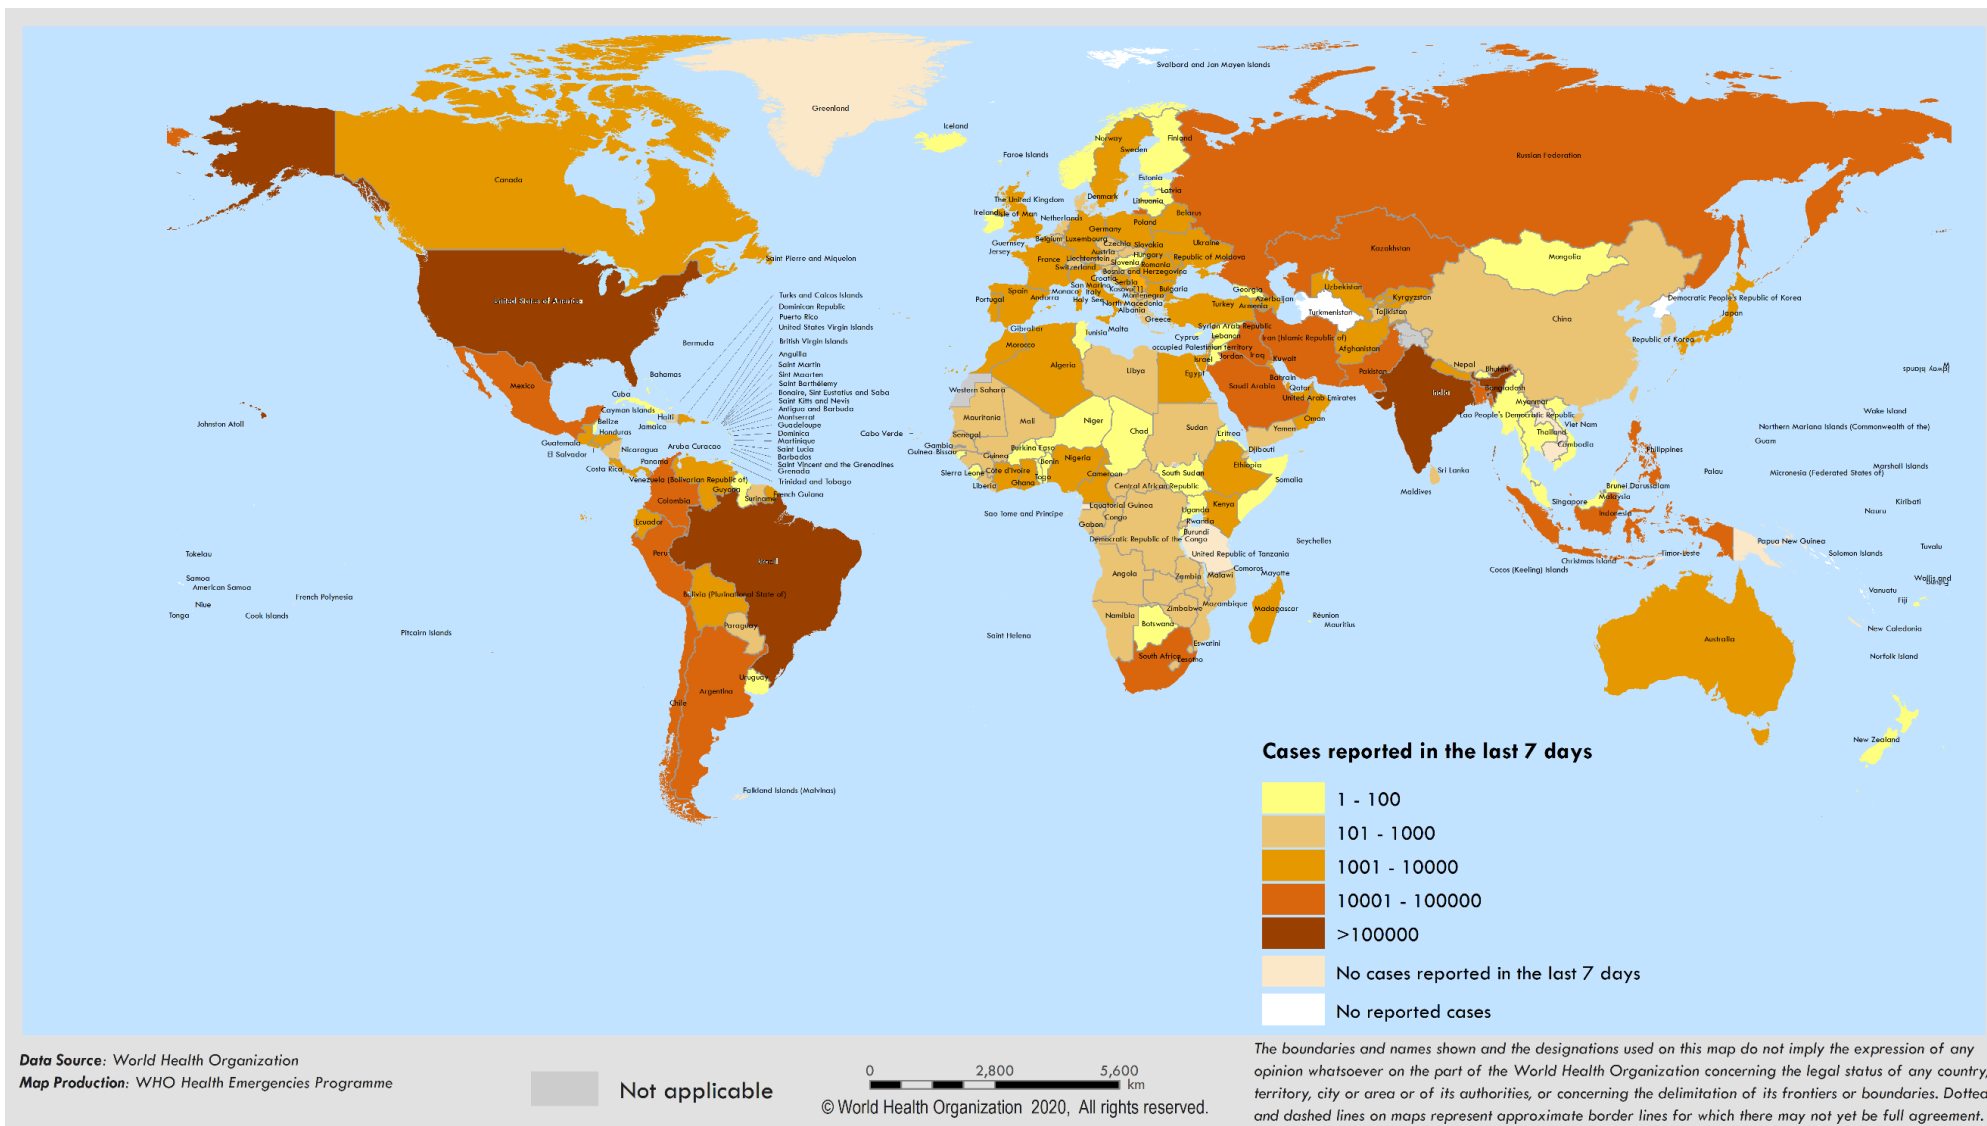

### Situation in numbers (by WHO Region)

Total (new cases in last 24 hours)

<b>Globally</b>	12 322 395 cases (219 983)	556 335 deaths (5 286)
<b>Africa</b>	443 412 cases (15 361)	7 930 deaths (197)
<b>Americas</b>	6 397 230 cases (132 520)	279 857 deaths (3 487)
<b>Eastern Mediterranean</b>	1 255 977 cases (17 198)	30 145 deaths (455)
<b>Europe</b>	2 888 850 cases (20 770)	202 837 deaths (497)
<b>South-East Asia</b>	1 097 074 cases (31 981)	27 990 deaths (608)
<b>Western Pacific</b>	239 111 cases (2 153)	7 563 deaths (42)

# Surveillance

Figure 1. Number of confirmed COVID-19 cases reported in the last seven days by country, territory or area, 5 July to 11 July \*\*

\*\*See [Annex 1](#) for data, table and figure notes.

Figure 2. Number of confirmed COVID-19 cases, by date of report and WHO region, 30 December through 11 July\*\*

\*\*See [Annex 1](#) for data, table and figure notes.

**Table 1. Countries, territories or areas with reported laboratory-confirmed COVID-19 cases and deaths, by WHO region. Data as of 10 AM CEST, 11 July 2020\*\***

Reporting Country/Territory/Area	Total confirmed cases	Total confirmed new cases	Total deaths	Total new deaths	Transmission classification <sup>i</sup>	Days since last reported case
<b>Africa</b>						
South Africa	250 687	12 348	3 860	140	Community transmission	0

## Case definitions

WHO periodically updates the [Global Surveillance for human infection with coronavirus disease \(COVID-19\)](#) document which includes surveillance definitions.

### Definition of COVID-19 death

A COVID-19 death is defined for surveillance purposes as a death resulting from a clinically compatible illness in a probable or confirmed COVID-19 case, unless there is a clear alternative cause of death that cannot be related to COVID-19 disease (e.g. trauma). There should be no period of complete recovery between the illness and death.

Further guidance for certification and classification (coding) of COVID-19 as cause of death is available [here](#) and [here](#).

---

## Annex 1: Data, table and figure notes

Caution must be taken when interpreting all data presented. Differences are to be expected between information products published by WHO, national public health authorities, and other sources using different inclusion criteria and different data cut-off times. While steps are taken to ensure accuracy and reliability, all data are subject to continuous verification and change. Case detection, definitions, testing strategies, reporting practice, and lag times differ between countries/territories/areas. These factors, amongst others, influence the counts presented, with variable underestimation of true case and death counts, and variable delays to reflecting these data at global level.

The designations employed, and the presentation of these materials do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement. Countries, territories and areas are arranged under the administering WHO region.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

<sup>[1]</sup> All references to Kosovo should be understood to be in the context of the United Nations Security Council resolution 1244 (1999). In the map, number of cases of Serbia and Kosovo (UNSCR 1244, 1999) have been aggregated for visualization purposes.

Counts reflect laboratory-confirmed cases and deaths, based on [WHO case definitions](#), unless stated otherwise (see Country, territory, or area-specific updates and errata), and include both domestic and repatriated cases.

Other\*: includes cases reported from international conveyances.

Due to the recent trend of countries conducting data reconciliation exercises which remove large numbers of cases or deaths from their total counts, WHO will now display such data as negative numbers in the "new cases" / "new deaths" columns as appropriate. This will aid readers in identifying when such adjustments occur. When additional details become available that allow the subtractions to be suitably apportioned to previous days, graphics will be updated accordingly. Prior situation reports will not be edited; see [covid19.who.int](https://covid19.who.int) for the most up-to-date data.

### Additional table notes

<sup>i</sup> Transmission classification is based on a process of country/territory/area self-reporting. Classifications are reviewed on a weekly basis and may be revised as new information becomes available. Differing degrees of transmission may be present within countries/territories/areas; classification is based on the highest category reported within a country/territory/area. Categories:

- No cases: with no confirmed cases
- Sporadic cases: with one or more cases, imported or locally detected
- Clusters of cases: experiencing cases, clustered in time, geographic location and/or by common exposures

- Community transmission: experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: large numbers of cases not linkable to transmission chains; large numbers of cases from sentinel lab surveillance; and/or multiple unrelated clusters in several areas of the country/territory/area
- Pending: transmission classification has not been reported to WHO

ii “Territories” include territories, areas, overseas dependencies and other jurisdictions of similar status.

### **Country, territory, or area-specific updates and errata**

- **Erratum 11 July, 2020, Paraguay:** Counts adjusted retrospectively to align with national authorities: 84 additional cases have been added.
- **Erratum 11 July, 2020 Philippines:** The original publication of the 10 July 2020 Situation Report excluded 4 new deaths. Counts have been corrected.
